## Cybersecurity for Municipal Councillor's

With the number and frequency of municipal cyber-attacks, municipal leaders must understand their role in ensuring the cyber resilience of their organization, and in leading through a cyber incident.

AMO has partnered with the ***Toronto Metropolitan University's (TMU) Rogers Cybersecure Catalyst*** to help councillors understand cybersecurity and to make critical decisions related to preventing, preparing for, and responding to cyber security incidents.

This half-day session is comprised of short lectures, guided discussions, and activities focused on understanding the cyber threats and risks posted to municipalities, identify preventative actions and best practices, and define the role of the elected official in cyber security and during incidents.
